

“This project simulation bridges the gap between theory and practice”

Silega Project Master™

Execute projects with maximum business impact

Project Management

Silega Project Master™

Project Management

70%

The experience:

Today's project leaders require a complex skill set that cannot be learned by simply reading a book or attend a presentation. People learn best by doing, but on-the-job training can be too costly when project success is at risk.

Silega Project Master™ simulates all stages of project management, from planning and defining scope to managing a budget, communication, people, quality and metrics. Participants must deal with approaching deadlines, miscommunication, lack of resources, and external pressure.

The different teams compete to achieve maximum business value. In order to win this simulation they

have to meet the established deadlines, maintain the required quality levels, and stay under budget. Silega Project Master™ can be customized to better meet your company's requirements .

Main objectives:

- Build and maintain an appropriate project schedule and budget
- Improve tracking of project expenditures and ensure the project stays within budget
- Create a common understanding and vocabulary
- Monitor project status and completion
- Recognize and avoid common project pitfalls
- Improve communication with

stakeholders and other project team members

- Identify and address the primary project issues
- Think effectively under pressure and prepare for the unexpected

Key lessons:

- Develop and implement a project plan
- Identify and manage issues, change, communication, and project risks
- Create strategies for selecting, developing, and managing people for project teams
- Identify and manage the appropriate level of quality
- Identify metrics to improve processes and declare success
- Learn how resources are estimated and authorized
- Understand the most common project team members roles
- Assess project client expectations and satisfaction levels

Typical applications:

- Project management training or certification
- Kick-off a new project
- Improve an existing project
- Simulate a project before it happens

of all projects fail to deliver the benefits anticipated at the planning stage.

Get higher ROI on your project management training by simulating a complete project in just 5 hours.
